## Profile

---

Software Developer focused on backend and automation, with solid experience in Python and cloud system architecture (AWS). Highly analytical and self-taught profile, seeking to build efficient and scalable solutions through API integration and software engineering best practices. Seeking opportunities to apply and expand my skills in challenging projects.

## Experience

---

### MeliGPT – Independent Software Development Project 2024-2025

- Developed a serverless backend architecture using Python and AWS Lambda for an automation system.
- Integrated the official Mercado Livre REST API to process data in real-time, reducing customer response time from hours to seconds.
- Built a custom credit management system, with a frontend created in Next.js.
- Applied Git and GitHub for version control and project code organization.

### BAJA RS – Off-road vehicle competition 2019

- Project developed within UFRGS, where the BAJA Tchê team builds the prototype entirely from scratch, in-house; worked in the electrical sector, developing embedded systems for the off-road competition vehicle.
- Designed and programmed a proprietary control board based on Arduino (C++), aiming for resource optimization.
- Implemented a proprietary hardware design to monitor 5 critical sensors (speed, fuel level, brake lights, etc.) of the competition vehicle.
- The in-house development resulted in a 70% savings in acquisition costs for monitoring components.

### DAER - Departamento Autônomo de Estradas de Rodagem 2021-2022

- Provided essential technical support for approximately 1,300 users at headquarters, focusing on hardware and software diagnosis and troubleshooting.
- Executed preventive maintenance on computers and internal applications, ensuring the stability of the department's IT infrastructure.

## Education

---

### Systems Analysis and Development - PUCRS 2025-2027 - 5th Stage

### Computer Engineering - Federal University of Rio Grande do Sul (UFRGS) 2018-2025 - 7th Semester (Paused)

## Skills

---

**Cloud & Backend:** AWS, REST APIs, Node

**Programming Languages:** Python, C/C++, Java, JavaScript

**Database and BI:** SQL, Power BI

**Frontend:** Next.js, React, HTML, CSS

**Tools:** Git, GitHub

**Spoken Languages:** Portuguese (Native), English (Advanced), Spanish (Intermediate)
